

SPONSORSHIP PACKAGE

MCMMASTER ROCKETRY

ABOUT THE TEAM

A **student-run** team providing an opportunity for McMaster students to **design, build, test, and launch** rockets with innovative technology while following engineering safety & design principles. We currently have over 100 active members and have **successfully launched and recovered our 4th high-power rocket** at **Launch Canada 2025**. Each year we compete at **Launch Canada**, with team goals to achieve 30,000ft and a speed of Mach 2 at the 2026 competition.

- Sponsor outreach events **with rockets**
- **Customized promotion** as requested!

LAUNCH CANADA COMPETITION

Launch Canada is Canada's first **major national rocketry competition**. It offers an opportunity for **Canadian rocket teams** to **launch high powered rocketry projects**, as well as **discuss** and **present** their **technical designs**. It is a chance to **connect** with **students** and **professionals** who are **enthusiastic, dynamic,** and **very knowledgeable**.

McMaster Rocketry is a **competitive team** at Launch Canada. In summer 2025, our fifth high-power rocket earned us **third place** in the Basic Launch Category and **first place** in the Payload Challenge.

In summer 2026, McMaster rocketry plans on competing again the in Basic Launch Category and Payload Challenge in addition to the Tech Development Challenge where we will be static test firing our student designed **hybrid rocket engine**.
