SPONSORSHIP PACKAGE · 2026–27

ABOUT THE TEAM

Two competition seasons, both with a Payload Challenge win.

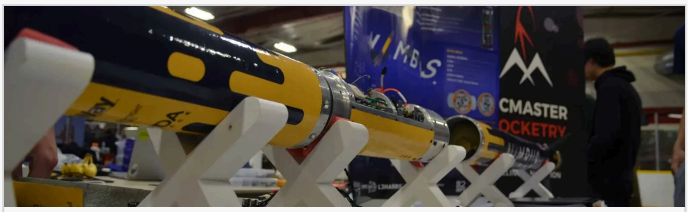
A student-run team at McMaster University. We design, build, and fly our own high-power rockets and the student-engineered payloads that fly on them, competing at Launch Canada.

100+	7	4	2022
ACTIVE MEMBERS	SUBTEAMS	FACULTIES	FOUNDED

2026 · LAUNCH CANADA

Osiris

33,551 ft at Mach 1.92, our highest and fastest vehicle to date. 1st place, Payload Challenge, flying Magpie, a self-healing-polymer fracture test.



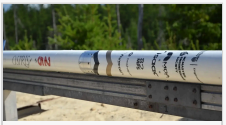
2025 · LAUNCH CANADA

Nimbus

3rd place, Basic Launch Category. 1st place, Payload Challenge, flying Sparrow, a 360° flight camera and recovery beacon.

We said we would. The team's stated 2026 goal was 30,000 ft at Mach 2. Osiris flew to 33,551 ft at Mach 1.92, past the altitude target and close on speed.

THE FLEET, 2022–2026



2026
Osiris

2025
Nimbus

2024
Luminis V2

2024
Luminis

2023
Marauder II

2022
Marauder I

In development. Propulsion is building Icarus, the team's in-house hybrid engine burning N_2O and paraffin wax, moving through static-fire testing alongside the commercial motors flown today.

TIERS

What you get.

Three tiers, based on total sponsorship value in monetary donations, discounts, or products.

Bronze

$500+

Sponsorship value greater than $500 in monetary donations, discounts or products.

- Small logo placement on the website and T-shirts
- Logo in all team videos and presentations
- Featured social media posts

Silver

$2,000+

Sponsorship value greater than $2,000 in monetary donations, discounts or products.

- Medium logo placement on the website, banner, T-shirts and rocket
- Logo in all team videos and presentations
- Featured social media posts
- Short write-up on the sponsorship page

Gold

$3,000+

Sponsorship value greater than $3,000 in monetary donations, discounts or products.

- Large logo placement on the website, banner, T-shirt and rocket
- Logo in all team videos and presentations
- Featured social media posts
- Long write-up on the sponsorship page
- Sponsor outreach events with rockets
- Recruiting events with team members
- Custom promotion when you ask for it

WHAT IT BUYS

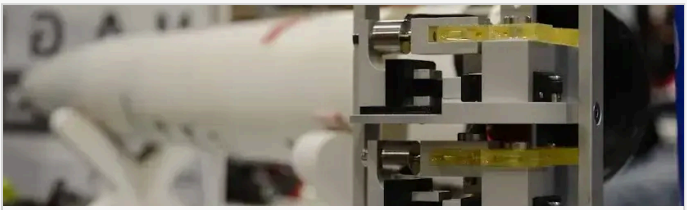
We publish this because sponsors ask. A team that won't say where the money goes isn't a team worth funding.

CATEGORY	COVERS	2026–27
Propulsion	Engine assembly, pressure testing, fill system, fuel casting setup	$9,445
Competition 2027	Launch Canada fees, accommodation, travel	$15,950
Airframe	Commercial motor fuel and casing, structural stock and fasteners	$7,882
Payload	Technical experiment, control PCBs, stock, workspace equipment	$5,875
Controls and avionics	Recovery control PCBs, flight data acquisition, bay structure	$3,429
Recovery	Parachutes, harness lines, recovery electronics, airbrake structure	$2,849
Operations	Campus outreach, recruitment, team logistics	$2,759
Composite manufacturing	Fibreglass and carbon fibre, epoxy, jigs, PPE	$1,845
Total	**2026–27 season projected expenses**	**$50,034**

LAUNCH CANADA

Canada’s first major national rocketry competition.

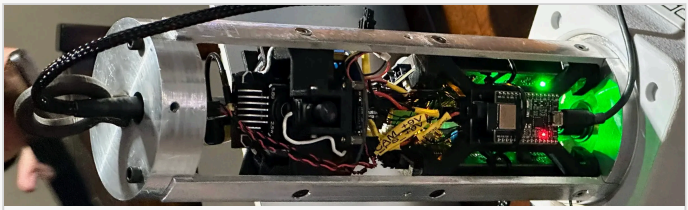
Canadian rocket teams launch high-power vehicles, present their technical designs, and compete for placings across the Basic Launch, Payload Challenge, and Tech Development categories.



MAGPIE · 2026

Self-healing polymer

McMaster Rocketry's first scientific payload: an SRAD fracture-test module studying self-healing polymer performance under real flight loads on Osiris.



SPARROW · 2025

360° flight camera

A 360-degree camera paired with a recovery beacon, flown on Nimbus: full-flight footage in every direction, plus a faster find after landing.

This is what a sponsorship dollar is actually funding: two straight years of a team that designs its own payloads, not just buys a kit rocket, and wins the category built for exactly that.
